

Enterprise Cloud Computing: Understanding Costs, Managing Risks and Realising Business Value

- 22-23 July 2010
- Paul Brebner, NICTA & Anna Liu, NICTA
- NICTA Canberra Research Laboratory
- 1 Day Course: AU\$770 (includes GST)
- 2 Day Course: AU\$1320 (includes GST)

Are you prepared to commit your core enterprise systems to the Cloud?

Cloud computing is widely promoted as a technology that can assist both large and small enterprises acquire and grow their computing capacity, scale-up their business activity when the demand arises, and reduce costs of ICT expenditure.

- » **But...**, how do you know if your current and future enterprise applications will perform safely and efficiently in the cloud?
- » **How much** is a cloud commitment really going to cost your organisation?
- » For organisations with significant legacy, it's not just the procurement cost of the cloud computing service, but what about the **cost of re-architecting** existing applications and infrastructure?
- » And how will it affect your **future business strategy**?
- » Should you **lock-in to a contract** during the hype and excitement, or wait until the market and technology matures?

Target Audience

- » CIOs.
- » Enterprise Architects,
- » Business Architects,
- » Program Managers

This 2-day NICTA course is aimed at decision makers in both public sector organisations and commercial enterprises who are trying to grapple with cloud computing concepts and vendor technologies, and who need to understand how cloud technology fits into their strategic business plans in areas such as enterprise architecture and ICT provisioning.

Teaching Arrangements:

The course will be conducted from 9.00 am to 5.00 pm. Morning tea, lunch and afternoon tea will be provided.

For further info please contact
Anne-Marie Eliseo +61 8 8343 8710
or email industryeducation@nicta.com.au

Level of Difficulty

- » Day 1: Intermediate
- » Day 2: Intermediate/Advanced-Day 1 is prerequisite

The course is focused on critical aspects of cloud understanding, such as the costs and performance risks to the business associated with the (incorrect) use of cloud products and services in major ICT re-architecting initiatives. The course is presented by NICTA experts and draws upon leading-edge research and technology developed by NICTA in the fields of cloud computing and enterprise performance.

Course Outcomes

At the conclusion of Day 1, course participants will have gained an understanding of current cloud technologies and the typical costs, benefits and risks to their business associated with different cloud computing strategies. For those participants who continue the course and complete Day 2, they will have extended their understanding with additional topics to support development of a cloud computing strategy for their organisation.
