## **Media Alert - NICTA to present at ANZA Technology Network**

**Broadcast live Wednesday 24 October 6.45am (11:45 -11:50 am Pacific time) and available afterwards online from [www.jeetu.com](http://www.jeetu.com)**

---

NICTA's Managing and Monitoring the Internet (MAMI) project will be presenting at the ANZA Technology Network in California.

Technology being developed by NICTA's Managing and Monitoring the Internet (MAMI) project aims to significantly reduce the need to spend millions of dollars overbuilding networks or the use of inefficient compensation techniques to ensure reliability and performance. NICTA research will enable real-time provisioning and better management of capital equipment.

The MAMI team, based at NICTA's Victorian Research Laboratory, is developing new products for analysing the performance of high-speed optical networks.

ANZA is the Australia, New Zealand, and America Technology Network, an independent organisation which connects the Australian, New Zealand and US technology sectors.

ANZA's Gateway to the US program culminates in a 3-day summit – the ANZA Technology Network - in Silicon Valley, US, where companies showcase before a US audience with senior-level business opportunity and funding connections.

The MAMI project, which will be known as 'Euclidics' when it spins out of NICTA, will be presenting at 6.45am on Wednesday 24 October 2007.

The 6th Annual ANZA Gateway to the US summit will be broadcast live and recorded by Jeetu - <http://www.anzatechnet.com/>.
